Table 1 - How the Housing Land Supply Position is Calculated for Five-Year Period 1 April 2026 to 31 March 20316

Table 2 – Five-Year Housing Land Supply Phasing Justifications for Non-Consented (Residential) Local Plan Site Allocations as of 1 April 2026.....13

Introduction

1. This document explains the approach being taken by Tunbridge Wells Borough Council (the Council) to calculate its housing land supply position. The calculation is a comparison between the anticipated supply of new homes against the number of new homes that are required to be built within the borough over a five-year period as per [National Planning Policy Framework](#) (NPPF August 2026) Annex D. The calculation is expressed as the number of years' worth of supply over a five-year period. For a Local Planning Authority (LPA) to be able to state that it has an adequate housing land supply to meet a five-year requirement, the supply of housing should equal or exceed five years plus any applicable buffers. Further discussion on buffers can be found at paragraphs 6 – 8 below.

NPPF Housing Requirement and Housing Supply

2. The NPPF at HO2 requires Strategic policy-making authorities to establish a housing requirement for each local planning authority within their strategy area. Where a spatial development strategy is not in place, as in the Tunbridge Wells Borough, Local Plans should establish the housing requirement figure
3. The Council has an adopted Local Plan (2020-2038), for which the annual Housing Requirement over the Plan period is 678 dwellings per annum. This is the requirement against which this Five-Year Housing Land Supply Statement has been measured.
4. The NPPF expects strategic policy-making authorities to follow the standard method in the Housing and Economic needs assessment for assessing local housing need. The standard method has been updated in government guidance <https://www.gov.uk/guidance/housing-and-economic-development-needs-assessments>). The formula now used incorporates a baseline of local housing stock which is then adjusted upwards to reflect local affordability pressures to identify the unconstrained minimum number of homes to be planned for. The new calculation

increases the Objectively Assessed Need (OAN) for the borough significantly due to the increased weight given to affordability. The OAN to be planned for, the latest calculation being June 2026, increases housing need to circa.1,100 dwellings per annum (dpa), not including applicable buffers, based on the most recent dwelling stock figures published in May 2026 ([Dwelling stock \(including vacants\) - GOV.UK](#)). The increased figure will be considered as part of the Local Plan review.

5. At HO3 the NPPF states that Local Plans should identify a sufficient supply and mix of sites to meet or exceed the housing requirement. Specifically, at HO3 1a ii, a supply of specific deliverable sites for five years should be identified.
6. Using the figure of 678 dpa, this statement, for the position as of 1 April 2026, sets out the supply of specific deliverable sites for the next five years to meet this requirement.
7. The NPPF was updated in August 2026. Annex D sets out applicable buffers to be applied to the housing requirement: [National Planning Policy Framework.pdf](#). The applicable buffer has increased from 5 – 20% in accordance with Annex D paragraph 9c below:

For the purposes of decision-making only, 20% where a local planning authority has a housing requirement adopted in the last five years examined against a version of the Framework published prior to December 2024, and whose annual average housing requirement is 80% or less of the most up-to-date local housing need figure calculated using the standard method set out above.

8. Homes are classed as any self-contained permanent residential dwelling that has been established through the planning application process. The housing land supply calculation is concerned with the 'net' increase to the housing stock considering any demolitions. While the re-use of empty homes provides an important source to meet housing needs, as with replacement dwellings, bringing empty homes back into use does not normally add to the overall supply of new housing as there is no 'net' increase in supply.
9. Communal accommodation (most commonly C2 care homes and student accommodation) can also be counted towards the housing land supply, albeit not

on a like-for-like basis in comparison to C3 housing units unless, such as in the case of student accommodation, the units are studio flats which are self-contained with their own kitchen and bathroom facilities that fully functions as an independent dwelling. The contribution that residential institutions/communal accommodation makes to the supply of housing is based upon the amount of housing that is released upon the occupation of communal units; in accordance with the relevant PPG <https://www.gov.uk/guidance/housing-for-older-and-disabled-people>. This calculation is based on the average number of adults living in households in the borough using Census Data. Using the latest 2021 Census Data, the average number of adults currently in households in the borough is 1.92. To calculate the contribution C2 schemes therefore make to the borough's housing supply, for every 1.92 C2 units, a C3 value of 1 is given.

Tunbridge Wells Borough Council's Housing Land Supply Position

10. Each year, the Council prepares a calculation to show the updated housing land supply position for the borough as of 1 April (the base date). **Table 1** below has been prepared to present the steps taken to arrive at the housing land supply outcome. For the period of monitoring covered by this document, as above the annual housing requirement is 678 dpa.
11. While the Standard Method considers previous delivery, and therefore there is no need to separately address any previous under-supply, it is noted that the Council is partly through the adopted Local Plan's Plan period (2020-2038) meaning that regard will be given to any shortfall or surplus in delivery during 2020-26. The Council considers that the most appropriate approach to addressing any shortfall in previous delivery within the Plan period is to distribute the shortfall over the next five-year period (the 'Sedgefield' approach). The purpose of this is primarily to encourage a 'bounce-back' in local housing delivery.
12. The current housing land supply position (as of 1 April 2026) is shown in **Table 1** below (figures presented in right-hand column) with an explanation as to how each stage is calculated in the third column.

Table 1 - How the Housing Land Supply Position is Calculated for Five-Year Period 1 April 2026 to 31 March 2031

Row	Housing Land Supply Component	How is Component Calculated	Housing Land Supply Calculations (April 2025-March 2030)
1	Annualised Housing Requirement	Local Plan adopted housing requirement	678
2	Completions Between 1 April 2021 – 31 March 2026	Number of completions recorded through annual monitoring work for 2020/21, 2021/22, 2022/23, 2023/24, 2024/25 and 2025/26 monitoring periods	690+518+636+611+616 + 460 = 3,531
3	Spreading the Shortfall Over the Next Five Years	690 (+12 for 2020/21), 518 (-160 for 2021/22), 636 (- 42 for 2022/23), 611 (- 67 for 2023/24), 616 (- 62 for 2024/25), 460 (- 218 for 2025/26) represents a shortfall of 537 dwellings. This shortfall is divided over the next five years.	107.4 dpa
4	Revised Annualised Need Across Five-Year Period	Need of 678 plus annualised shortfall of 107.4	785.4 dpa to take account shortfall
5	Five-Year Requirement	Row 4 multiplied by 5 (rounded to the nearest whole number)	3,927
6	Any Applicable Buffers	20% as per NPPF August 2026 requirement – see Annex D	785.4
7	Total Five-Year Housing Land Supply Need	Row 5 plus Row 6 (rounded to the nearest whole number)	4,712
8	Annualised Five-Year Housing Land Supply Need	Row 7 divided by 5 (rounded to the nearest whole number)	942

Row	Housing Land Supply Component	How is Component Calculated	Housing Land Supply Calculations (April 2025-March 2030)
9	Phasing of Extant Planning Permissions Within Five-Year Period	A separate list is provided to support this figure in separate Appendix 2. This represents the number of dwellings expected to be delivered within the five-year period. This figure is inclusive of any C2 discount	2,299
10	Phasing of Local Plan Allocations Without Planning Permission Within Five-Year Period	A separate list is provided to support this figure in separate Appendix 1. This represents the number of dwellings expected to be delivered within the five-year period. This figure is inclusive of any C2 discount	1,833
11	Windfall Allowance (Years 4 and 5)	The figure is the annual windfall allowance multiplied by 2 (for years 4 and 5)	304
12	Total Identified Supply	Total of Rows 9, 10 and 11	4,436
13	Supply Position (Years)	The number of Years' Supply. (Row 12 divided by Row 7, multiplied by 5 years)	4.70

13. **Table 1** above shows that, based on the local housing need figure of 678 dpa, accounting for previous shortfall in delivery plus the applicable 20% buffer, as of 1 April 2026 using the Sedgefield approach, the Council can demonstrate a housing land supply of 4.70 years.

Deliverability of Sites

14. To be considered as deliverable within the next five years, the NPPF Glossary at Annex B states:

Deliverable: To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that homes will be delivered on the site within five years.

15. For each of the sites included within the five-year period, various details are used as evidence to ensure they meet the requirements of the NPPF. This information includes:
- For sites with planning permission, details of a site's availability for development have been sought (discussed further on), to include, for example, timescales for delivery/completions to ascertain delivery within the five-year period. It may be that on larger sites only a proportion of the planning approval will be delivered within the first five years due to longer-term phasing and a staggered release of completed units.
 - For allocated sites without planning permission, site capacity estimates had been calculated by Council officers as part of the Strategic Housing and Economic Land Availability Assessment (SHELAA) process. Each site has unique characteristics and, rather than apply a standard approach (e.g., a simple housing density calculation), a more contextual assessment had been adopted which included aspects of urban design and local distinctiveness to provide greater accuracy and certainty on the actual development potential of the sites. It is still recognised that only a planning approval will be able to provide an actual figure of the development capacity of the site and therefore the capacity on identified sites is subject to change.
 - Additional information, obtained from the developer, agent, and/or applicant of an extant planning permission that supports including the site within the five-year period, including phasing and build-out rate information, has been used. Where information has not been obtained from the developer, agent, and/or applicant, the Council may also independently review marketing details on sites, any recent planning history in discussion with Council case officers (such as recent discharging of conditions/submission of details), seek Council Tax records through contacting Revenues and Benefits, use Building Control completion records, and Energy Performance Certificate records (required for new-build development post-completion and prior to occupation). For those

sites where planning permissions have recently expired or are due to expire shortly after the base date of the new five-year housing land supply period, the Council has aimed to confirm whether the consented development has been implemented and/or is being advertised for the consented use or if the previous use (prior to consent) is still being advertised or is currently occupied as per the previous use. Where the latter is the case, the Council has made the decision to assume that such permissions will not be deliverable.

- Sites with planning permission may have been subject to an assessment of their viability by an independent viability consultant during assessing/determining the planning application. For other sites, it is assumed that, as the site is being promoted for development, then development of the site is viable. If a developer has informed the Council that a permission is no longer viable (e.g. due to fluctuating market conditions), and/or if the developer has run into financial difficulties, then the Council has made a decision to either include or exclude the site from the five-year housing land supply period depending on whether the site has been implemented (i.e., is under construction) as well as the extent to which the site is built-out, and if the developer is still seeking to promote and deliver the site (dependent on, for example, possible amendments sought to the current permission to ensure viability).

16. Further discussion on the different components of the Council's housing land supply, as well as their deliverability, is provided in the following sections.

Local Plan Site Allocations

17. These comprise residential allocations in the Adopted Local Plan where planning permission has yet to be granted for their development as at the base date of this Statement. Consequently, the figure/capacity, as identified in the Local Plan, included within the five-year period may not equal the figure/capacity granted in any future planning consent. The site capacities of these sites were originally determined based on site-specific assessments as part of preparing the Local Plan as explained above. This included an assessment of the site capacity of any previously allocated sites as part of the 2016 Site Allocations Local Plan (SALP). It

should also be noted that there may be sites which already partly benefit from planning permission, in which case the planning consent has been discounted from the phased capacity to avoid double-counting.

18. These assessments can be found in the Local Plan's [Strategic Housing and Economic Land Availability Assessment \(SHELAA\)](#)
 19. Whilst all sites allocated in the Local Plan which have yet to be granted planning permission, could be included within the five-year period, inclusion of these sites is subject to an assessment of likelihood of delivery within the five-year period depending on the evidence available. This means that sites may also be phased both within and beyond the five-year period if it is considered that the site, in its entirety, is unlikely to be delivered within the five-year period.
 20. The NPPF under the definition of "Deliverable" notes particularly:

b. where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield land register, it should only be considered deliverable where there is clear evidence that homes will be delivered on-site within five years.

Consequently, in determining whether an identified site will be delivered within the five-year period:
- The Council has reviewed whether the site has any relevant recent planning activity prior to planning consent, such as whether the site has an active/undetermined planning application or if pre-application advice meetings have taken place which are consequently factored into the Council's phasing assumptions.
 - The Council has factored in whether there has been any recent correspondence with the site promoters as part of the preparation of the now adopted Local Plan which indicates when a site may be delivered. As such, some identified sites may not be included within the five-year period if correspondence indicates that they will be delivered beyond the five-year period (either in part or in their entirety).

- Discussions with senior officers in Planning Services have also been useful, as officers usually have broad, up-to-date knowledge of sites within the borough and any latest (including pre-app) discussions.

21. For those sites listed in Appendix 1, for inclusion within the five-year period the Council must demonstrate that there is clear evidence that housing completions will begin on site within five years. This justification is provided for each site in Table 2 below, with phasing details provided in Appendix 1. To clarify, sites listed in Table 2 are those Local Plan site allocations that do not benefit from planning permission as of 1 April 2026 but are phased completely or partly within the five-year period. The table provides justification for such inclusion. Sites included in previous iterations of this Statement which have been removed are those sites which now have full planning permission (or a resolution to grant planning permission) and are therefore counted separately under extant planning permissions in Appendix 2 to avoid double-counting.

Table 2 – Five-Year Housing Land Supply Phasing Justifications for Non-Consented (Residential) Local Plan Site Allocations as of 1 April 2026

Local Plan Site Allocation Reference	Site Address	Site Capacity (Net)	Site Capacity (Net Mid-Point)	Number of Dwellings Expected to be Delivered Within Five Years (Net)	Justification if Phased for Inclusion Within Five-Year Housing Land Supply
STR/RTW 2	The Strategy for Royal Tunbridge Wells Town Centre	150 - 200	175	0	Superseded by AXA Phillips and Eynsham House and monitored under extant permission 24/01150/FULL which is considered deliverable in 5-year period. Other sites in RTW Town Centre not phased for delivery within five-year period.
AL/RTW 2	Land at the Auction House, Linden Park Road	0	0	0	Not phased for delivery within five-year period.
AL/RTW 3	Land at Lifestyle Ford, Mount Ephraim/Culverden Street/Rock Villa Road	100	100	100	Full planning application under reference 25/02604/FULL currently being considered and therefore considered deliverable within 5 years.
AL/RTW 7	Land at former Gas Works, Sandhurst Road	170 - 200	185	90	Planning application received for up to 90 units.25/02259/OUT. Validated October 2025 and considered deliverable within 5 years with

Local Plan Site Allocation Reference	Site Address	Site Capacity (Net)	Site Capacity (Net Mid-Point)	Number of Dwellings Expected to be Delivered Within Five Years (Net)	Justification if Phased for Inclusion Within Five-Year Housing Land Supply
					remaining 95 units phased outside of the five-year period.
AL/RTW 9	Land at Beechwood Sacred Heart School	69	69	0	Not phased for delivery within five-year period.
AL/RTW 12	Land at Tunbridge Wells Telephone Engineering Centre, Broadwater Down	50	50	0	Not phased for delivery within five-year period.
AL/RTW 14	Land at Wyevale Garden Centre, Eridge Road	25 - 30	28	0	Not phased for delivery within five-year period.
AL/RTW 16	Land to the west of Eridge Road at Spratsbrook Farm	120	120	120	Live application 26/00094/FULL for 125 dwellings validated January 2026 and awaiting decision. Phased in 5-year delivery
AL/RTW 20	Land at Culverden Stadium, Culverden Down	30	30	0	Not phased for delivery within five-year period.
AL/RTW 21	Land at Colebrook Sports Field, Liptraps Lane	80	80	0	Not phased for delivery within five-year period.
AL/RTW 22	Land at Bayham Sports Field West	20 - 25	23	0	Not phased for delivery within five-year period.
AL/SO 3	Land at Baldwins Lane	26	26	0	Not phased for delivery within five-year period.
STR/SS 1	The Strategy for Paddock Wood and east Capel	2,374 – 2,532	2,453		See commentary on individual parcels below.
	East Parcel (Redrow)			410	Developer provided a revised trajectory 30/10/25 showing 410 dwellings provided in five-year supply
	East Parcel (Persimmon)			370	Developer provided a revised trajectory 30/10/25 showing delivery of 370 units within the five-year period.

Local Plan Site Allocation Reference	Site Address	Site Capacity (Net)	Site Capacity (Net Mid-Point)	Number of Dwellings Expected to be Delivered Within Five Years (Net)	Justification if Phased for Inclusion Within Five-Year Housing Land Supply
	West Parcel (Crest)			290	Developer provided a revised trajectory 30/10/25 showing delivery of 290 units within the five-year period.
	West Parcel (Dandara)			230	Developer provided a revised trajectory 30/10/25 showing delivery of 230 homes within the five-year period.
STR/SS 2	The Strategy for Paddock Wood Town Centre	30	30	0	Not phased for delivery within five-year period.
AL/CRS 2	Land south of Corn Hall, Crane Valley, Cranbrook	35 - 45	40	40	Application validated to be determined over coming months 26/00845
AL/HO 3	Land to the east of Horsmonden (Bassetts Farm)	115 - 165	140	120	Site has planning permission for 20 units under reference 19/03657/REM and is under construction with completion expected September '26. The 20 units are monitored under extant permissions. The balance, 120 units, is subject to 24/00078/HYBRID which has a Resolution to Grant, (RTG) in May 2025, subject to S106 agreement negotiations. Full details are provided for the 120 units, and the applicant has confirmed they anticipate delivery from 2027-28. Given that the developer already has an extant planning consent and is seeking to discharge conditions, as well as given the current RTG and the applicant's indicative timescales for delivery, it is considered that there is clear evidence of deliverability.
AL/PE 1	Land rear of High Street and west of Chalket Lane	50 - 60	55	0	44 units for final year of 5-year supply, given pre-app discussions.
AL/PE 2	Land at Hubbles Farm and south of Hastings Road	80	80	99	Planning application reference 24/02085 for 99 units has resolution to grant (RTG) on 11/03/2026 and the site is therefore considered deliverable for 99 units. This is now included in Appendix 2 as an extant permission. (RTG)

Local Plan Site Allocation Reference	Site Address	Site Capacity (Net)	Site Capacity (Net Mid-Point)	Number of Dwellings Expected to be Delivered Within Five Years (Net)	Justification if Phased for Inclusion Within Five-Year Housing Land Supply
AL/PE 3	Land north of the A21, south and west of Hastings Road	80	80	87	Planning application reference 24/03141/FULL for 87 units has Resolution to Grant (RTG) on 11/03/26 and therefore considered deliverable in 5 years. This is included in Appendix 2 as an extant permission, (RTG).
AL/PE 4A	Land at Downingbury Farm, Maidstone Road	25	25	25	Application expected in September for up to 54 units so will keep the allocation number 25 in 5-year supply.
AL/SA 2	Sharps Hill Farm, Queen Street	10 - 15	13	13	Numerous pre-apps for this site and we have sufficient information that it is deliverable in 5-year land supply.
AL/SP 1	Land to the west of Langton Road and south of Ferbies	10 - 12	11	11	Kept towards end of 5-year supply.

Sites with Outstanding Planning Permissions (Extant Consents) and Extant Prior Notification

22. In the NPPF's definition of 'Deliverable' states: "*sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans)*". Consequently, the Council has assumed that all small sites will be deliverable within the five-year period unless there is sufficient available evidence to suggest that this is not the case.
23. Considering the above, where the Council has received (e.g., from the applicant) or obtained information confirming that an extant planning consent as of 1st April 2026 will not be proceeded with/implemented, the Council has removed these extant planning consents from contributing toward supply (including beyond the five-year period).

24. As at Annex B of the NPPF, under the definition of 'Deliverable', it is stated that *"where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years"*. Clear evidence of deliverability of site allocations has been provided above. Regarding sites which have outline planning permission for major development as of 1 April 2026 and are phased within the five-year period are discussed as follows:
- Former Site of Springfield Nurseries, Cranbrook Road, Hawkhurst, Cranbrook, Kent, TN18 5EE: 24 units permitted under 17/02192/OUT. Reserved Matters application has been approved on 8th June 2026, and Conditions are being discharged under planning reference 23/03184/SUB, approved 2nd July 2026. Therefore, units are considered deliverable in 5-year period.
 - Land South of Brenchley Road, Brenchley Road, Horsmonden, Tonbridge, Kent: 68 units permitted under planning reference 22/00296/OUT. Outline permission was approved in January 2025. More recently Reserved Matters were approved 25/02758/REM on 27th April 2026, just outside this monitoring year but even so the homes are considered deliverable in 5-year period.
 - Land North of Birchfield Grove, Hawkhurst, Cranbrook, Kent: 70 units with a resolution to grant under planning reference 22/02664/HYBRID. Full planning permission granted on 22nd May 2025 and considered deliverable in 5 years.
25. As of 1st April 2026, there are no extant permission in principle (PIP) applications for residential development.
26. In addition to the above, there are two applications that have received a resolution to grant planning consent prior to 1st April 2026 (that is, they had been approved by Planning Committee or by Planning Officers but a decision was yet to be issued, usually while a Section 106 Agreement is being agreed and signed). These two sites are included with the extant supply and meet the NPPF's definition of sites which have a grant of permission in principle. These sites are as follows:
- Hubbles Farm, Hastings Road, Pembury TN2 4JP (24/02085/OUT). 50 of the 99 units are phased to complete in the Five-Year period. It is

assumed that construction will commence in Year 3 of the 5 years in accordance with the Housing Supply and Trajectory Topic Paper 2021.

- Land North of the A21, South and West of Hastings Road, Pembury (24/03141/FULL). It is considered that all 87 units could be delivered in years 4 and 5 of the five-year period. This is considered deliverable given the site has full planning permission. Construction is assumed to commence in year 2 of the Five-Year Supply period as per the assumptions in the Housing Supply and Trajectory Paper 2021.

27. Regarding sites identified on the Council's Brownfield Register, it is noted that the Register was updated to 31st December 2025. There are seven Brownfield Register sites which have been removed from the list as they now have planning permission and are being monitored through the five-year supply extant permissions. In addition, two Local Plan allocations were removed from the Brownfield Land Register which are also being monitored through the Five-Year Supply – Phillips and Eynsham House, (extant permission ref 24/01150/FULL) and Land at Lifestyle Ford which has been submitted as a planning application and is considered in Appendix 1.
28. For all extant consents (minor and major), the Council has contacted all developers, agents, and/or applicants regarding the status of their site(s) and have asked for a range of detailed information on phasing, build-out rates, start/implementation dates, etc. As previously mentioned, the Council has reviewed several alternative methods/sources of data where this information has not been made available through this first stage of correspondence. Where there has continued to be a lack of sufficient information on a site, the current/last recorded development status of an application and the Council's Housing Delivery Phasing and Build-out Rate Methodology (found in the Council's latest [Housing Supply and Trajectory Topic Paper](#) prepared for the Local Plan) have been used to assess if a site is included within the five-year period.
29. The Housing Delivery Phasing and Build-out Rate Methodology has been developed to inform annual assessments as to when residential developments are likely to be brought forward and at what annual completion rate both for the Five-

Year Housing Land Supply Statement and the Local Plan Housing Trajectory. It also includes details of current processes the Council annually undertakes to gain information on each site.

30. As also mentioned within this statement, the Housing Delivery Phasing and Build-out Rate Methodology also details the current processes the Council undertakes annually to gain information on each site and explains the method of assessment used for when it has not been possible to obtain data from the development industry. The methodology also provides commentary on the phasing and expected build-out rate of housing sites based on site size and type. A range of different housing developers and planning agents had been consulted on this methodology, and their feedback has been considered in its development.

Making an Unidentified Sites/Windfall Allowance

31. Windfall sites are sites that have not been specifically allocated in the Local Plan. They normally comprise previously developed sites that have become available for redevelopment. Paragraph 75 of the NPPF advises that *"where an allowance is to be made for windfall sites as part of anticipated supply, there should be compelling evidence that they will provide a reliable source of supply. Any allowance should be realistic having regard to the strategic housing land availability assessment, historic windfall delivery rates and expected future trends"*. As part of the adopted Local Plan, the Council published a Development Strategy Topic Paper Addendum [\[PS 054\]](#) which assessed/reassessed the borough's windfall position as part of its review of the housing need and supply. This allowance is 152 dwellings per annum which begins from 1 April 2029 (year 4 of the current five-year period) to avoid duplication of any extant planning permissions/existing windfalls within the first three years (within which extant planning permissions/existing windfalls are most likely to be fully delivered). The figure of 152 is derived from a small-sites (1-9 unit) windfall allowance of 122 dwellings per annum along with a large-sites (10+ unit) windfall allowance of 30 dwellings per annum. These allowances are based on historic windfall delivery rates within the borough as set out within the Development Strategy Topic Paper Addendum as well as the Council's Local Plan Examination Hearing Statement [\[TWLP 131\]](#).

Housing Land Supply: Conclusions

32. The housing land supply position over the next five-year period is always a snapshot in time and the calculation is based on the adopted Local Plan housing target. It is important to remember that the objective of the housing land supply position is not simply to achieve a five-year supply of housing, but to maintain a minimum of five years' worth of housing supply plus any required buffer on an ongoing basis (as well as accounting for any surplus or shortfall in completions prior to the base date and within the emerging plan period).
33. The approach used by the Council to calculate its housing land supply position is a cautious and robust one, only including those sites and allocations where development is likely to take place within the next five years. Developers, agents, and/or applicants have been contacted to confirm availability and provide information about phasing of delivery and expected build-out rates, and where no response has been received, the Council has taken a cautious approach to phasing and build-out rates by reviewing all alternative sources of data available and applying the Council's methodology where appropriate.
34. The Council's current assessment of housing land supply, as of 1 April 2026, results in an anticipated housing land supply of 4.70 years which accounts for previous shortfall in delivery between 2020-2026 and includes the applicable 20% buffer. The position has been robustly justified and is based on clear evidence of deliverability as set out within this Statement. Please see separate Appendix 1 and 2 for further details of figures fed into Table 1.

Appendix 1: Local Plan Housing Trajectory

The Table below lists all Local Plan site allocations as of 1st April 2026 identified for residential development, that do not yet have planning consent but that are expected to deliver housing in the five-year period as per paragraph 18 above. Extant Planning Permissions are listed separately in Appendix 2.

If you are a planning applicant, developer or site promoter and would like to provide an update on your site to the Planning Policy team then please email us at planning.policy@tunbridgewells.gov.uk with the subject heading "Five-Year Housing Land Supply Site Update".
